SUMMARY

Front End Developer with experience in HTML, CSS, JavaScript and ReactJS. Having a background in computer science helped me tackle any problem, not just finding the solution but finding the optimal solution. On the coding side, I like to build a beautiful frontend design from start to finish, using unique and latest tools to maintain up-to-date products and applications. Highly passionate about giving back to community by volunteering at non-profit organization

TECHNICAL PROJECTS

OpTracker - GITHUB**|** DEMO **|** WEBSITE
No more spreadsheets, OpTracker organize your jobs with a beautiful user interface
+ Designed to make job search fun by representing each job in colorful cards
+ Developed ruby-on-rails backend to store user's information
+ Incorporated reusable components from React library for faster development of the website

COVID19 Tracker- GITHUB**|** WEBSITE
Latest updated data on all countries
+ Using two different API to show information like countries popular, flag and data on current COVID19
+ Utilized ReactJS for front-end and Styled-component for styling
+ Deploy with keeping responsive design into consideration

InvenTracker - GITHUB **|** DEMO **|** APP
Mobile App for keeping track of items/products
+ Developed the app using React native to simplify the process of tracking product/item and ability to deploy on iOS or Android platforms
+ Saved time by 50% when searching for product/item by implementing one-click scanner
+ Utilized expo library such an expoCamera to take a picture of the new product making product description more understandable
+ Designed industrial level UI/UX by writing custom CSS and using photoshop for graphics
+ Created backend using Ruby on Rails to store user information
